oper place in the financial world. The ited States Government is not strong ough to carry all the silver in the world. to time. but the United States, backed by th ountries just named, could easily insurlorever the parity of gold and silver. Certainly a most singular spectacle is uted to the world to-day in the contion of the finances of the government and cople of the United States. Silver dolrs, the bullion in which is not equal in ld bullion in gold doltars, are passed everywhere in this country as if they were banks and bankers have tendered gold to the government in exchange for notes These patriotic bankers deserve well of their country. Their generous offers in the nation's extremity must be entered to eir credit, and when again, if ever hereofter, the complaining masses shall for

nited States in restoring selver to its

government out of its difficulties must se the word to linger upon the tongue and never be heard by the public. There was a question raised in the United States Senate at its last session as to whether a member of Congress could ed with such a mission as that committed to the care of the delegates to the Brussels conference. The negative argument change on the other side it could not fairwas very strong. But Mr. CLEVELAND has ly be charged that "Richmond city" had no doubt reached the conclusion that the point was not well taken. The words of Gazete. Representative shall during the time for which he was elected be appointed to any civil office under the authority of the United States which shall have been cre-

inclined to style them "Shylocks" the

have been increased, during such time." The people of the United States have reason to repose unbounded confidence in a President who manifests such a spirit as Mr. CLEVELAND has manifested in making late General E. I. T. BEALE the appointments under consideration.

Mr. Carlisle's Scheme. There has been a good deal of curiosity as to what Mr. CARLISLE proposed to the New York bankers. The Sun, of that city, in its Washington news, tells what it was.

"It was that the government should issue on the basis of 3 per cent. \$50,000,000 of the 5 per cent ten-year bonds referred to in the resumption act and use them as collateral to obtain gold from the banks. The proposition was calling the bonds in one year or at any time after

one year when its reserve is in better shape.
"In other words, the Secretary wished to hypothecate \$50,000,000 of these bonds for a year or two, or until such time as Congress might authorize an issue of bonds for the purpose of replenishing the stock of gold which has bee depleted largely by the operation of the Sho

The New York bankers came to the con clusion that this proposition was in the right line or direction, but not exactly what the country needs. They in turn submitted a proposition to him, which the Secretary rejected. These discussions of financial questions cannot but tend to enlighten the public mind on such subjects. One object lesson is worth a dozen abstract theories. Nevertheless, the wrong inference is sometimes drawn from the facts. Thus a panic caused by the foolish fears of Wall street might be and would be charged up against the Democrats as the result of their wrong theories.

The Olcott Committee It seems that the delay in distributing the new bonds of the State of Virginia authorized by act of Assembly in accordance with the settlement made with the OLCOTT Committee is caused by the inabili-ty of Mr. PRELPS to attend a meeting of the Committee on Distribution, Mr. PRELES is one of the counsel of the United States in the case of the Bering-Sea dispute with England, which is now being

argued before arbitrators sitting in Paris. The fixing of the rates for distribution rests with a committee of three, composed of S. N. BRAITHWAITE, appointed by the Virginia Committee in London; John Henry DANIELL, appointed by the advisors in London, and EDWARD J. PHELPS, appointed by the Bondholders' Committee. Whatever rates are fixed by this committee for the exchange of the pooled securities held by it it is expected will be adopted by the State in the funding of the unpooled securities, so that the pooled and unpooled shall be, as far as possible, ton the same

It is to the interest of the public that the new bonds should be distributed as

soon as possible. We are rapidly nearing an important State campaign, and for once we should like to have a canvass in Virgi-nia without a mention of "the State debt." It may well be feared that this will not be the case if the bonds are not soon distributed. If the Bondholders' Committee knows what is good for itself it will proceed with this work without much further delay. If Mr. Partes cannot go to London the other members would do

well to go to him. The Bering-Sea arbitration is being conducted in a very leisurely way, and there s no telling how long it may be drawn out. The gentlemen engaged in it as arbitrators and counsel are having a good time in the most captivating capital in the world, and they will not care to adjourn

Anyhow, if the OLCOTT Committee will take the advice of good friends it will hurry up its distribution and thus afford to the world the spectacle of a political campaign in this State in which there is no reference made to "the State debt," and where mention of "tax-paying conpons" will be as much out of place as would be allusions to " Revolutionary warclaims" or the status of " warrants for lands located in the Northwest territory."

Fitz Lee and Cleveland.

The appointment by the President of FITZHUGH LES as one of the government directors in the Union Pacific Railway Company is evidence of his appreciation of our ex-Governor and proof of the sin-cerity of his declaration that he has no ill-will towards those of his supporters who agreed to the compromise in the Virginia convention last year.

Of course the President know that General Lee was one of the foremost men Mr. CLEVELAND has again exemplified his in bringing about that pacificatory arrangement by which the four delegates how to put the right man in the right place. He has decided to accept the re- ly between the CLEVELAND and anti-CLEVE-LAND men, for General Ler's speech on quoted references to Mr. CLEVELAND. Firz Lee bas long enjoyed the personal

This determination of the President means, or may mean, a great deal. It may been re-elected in 1888 he would have of-fered Firz one of the very best places at his disposal. And the General, we doubt as infallibly sound. The fact that he has not, might have had an appointment of decided that the United States shall be great consequence under this administrarepresented by a delegation a majority of tion but that the President well knew he had other plans. This directorship is a place nificant one, and to us is convincing proof of honor rather than of emolument. The that he recognizes the truth that there are two sides to all the questions which will travelling expenses, but the directors du compensation is a per diem of \$10 and actual come up for consideration in the Paris ties are important, as the government has conference. Silk Waists are to be used more than ever this summer. Some Silks we find so much better adapted than others for that purpose. We had an opportunity to secure a particularly desirable lot of Japanese Wash Silks at the lowest figures Japanese Wash Silks at the lowest ngures ever known, and they are here for your choice. There is nothing made that will wear more satisfactorily. We show fully fifty different patterns to-day. In law days there will not be so many, a law days there will not be so many.
